- Working well as a team
  - We cooperate well
  - Communication is key
  - Texting is our main goal
- Found our individual strengths and how to use these
  - Grace is good at SQL and will start on database
  - Most of us are strong at HTML
  - Will be some struggle in CSS
- Jobs:
  - Isabel: created our application description, CSS files is next jop
  - Grace: will create database and the SQL, helped with wirestream description
  - Caleb: create the git hub and set it all to be organized, helped with wirestream creation, partials and pages(big role that we will all be participating in when needed)
  - Alex: created use case diagram, will be starting on nav bar,
  - Jenna: scribe for lab 10, created storyboard and helped assign all of these
- Overall, a great team and looking strong.
- Need to fix github link as there was fear the team we created under the CSCI 3308 class could be deleted
- Talked about next week to make sure this git hub is all up to date and set
